

*U.S. Army Corps of Engineers, New Orleans District,
3rd Annual Partnering Conference*

2005 Conference Workshop Session I

“Cultivating Relationships Through Education, Collaboration, & Innovation”

Project Delivery Process – Workshop Session I

Presenters: Rodney Greenup, Thomas Podany, & Beth Wiggins

The purpose of this workshop is to discuss measures taken nationally, regionally, and at the district to improve the project delivery process. A short presentation will be provided on what historical events have led to shaping the need to improve our business processes, USACE 2012 Corporate Business process, the concept of Regional Business Centers (including a discussion of Regional Integration Teams and District Support Team), best management practices, standard levels of service, and the District Management Plan. The focus will be on how these measures are intended to improve the project delivery process (quality, cost, and timeliness) and how they might directly impact partners. After the presentation, there will be a group discussion and time for questions and answers.
